

FRONTLINE MAINTENANCE MANAGEMENT

Facilities, Asset & Maintenance Management Easy to use software

FrontLine Maintenance from Shire will help your organisation control costs, meet Quality, Health & Safety standards, manage resources and increase productivity. NHS trusts, local authorities, dockyards, manufacturers, ships, food processors, retailers, distributors, colleges, electrical contractors, maintenance contractors, estates and facilities managers, transport services and many more rely on FrontLine.

Simplicity from the outset; FrontLine is designed specifically for Asset Maintenance management. Whilst it is very easy to get started on the essentials, the feature rich suite of software will meet even the most demanding needs and users. So if you are looking for a simple solution or an enterprise strategic tool, FrontLine is flexible enough to cope.

Equipment/Asset Register

FrontLine offers a comprehensive multi-client, multi-asset register that can be organised by:

- Site
- Details of client and site address
- Contacts and notes
- Departments & personnel and more

Individual asset records show detailed information including:

Asset number	Description
Make/ model	Serial number
Supplier	Service
Warranty details	Location
Hazard assessment	

- plus set an unlimited number of data fields to suit each asset.

Planned Maintenance

Create a planned schedule of actions for maintenance, inspection, calibration, projects by week numbers, day and time, generate work orders on paper or send to a Shire compatible PDA for the paperless solution.

Predictive Maintenance

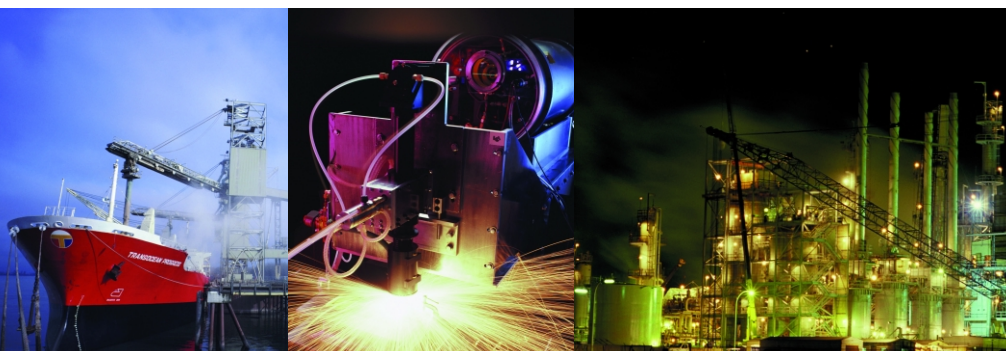

Prevent costly shut downs by working ahead of your plant or machinery operations. FrontLine can be used to record regular condition checks on your assets; readings can be taken, stored and regularly checked against upper and lower limits. This quality data provides the essential reports to monitor and detect potential problems.

Inspection & Test

In any industrial, commercial or public sector premises there are assets to be tested on a regular basis. FrontLine offers an advanced inspection and test facility to ensure compliance with the demands of Health and Safety and Quality systems.

Work Control

A dynamic Work List is created to help allocate maintenance, refurbishments and repairs - it can be the basic tool for controlling your maintenance procedures.

FRONTLINE MAINTENANCE MANAGEMENT

Shire Services

Shire offers a complete range of services - from initial advice and planning, through to installation, data conversion or entry and full implementation of your asset management system. Our aim is to have customers using the software with complete confidence from day one thereby gaining maximum benefit from the system through higher productivity, reduced costs and more efficient running of your organisation. We aim for complete customer satisfaction

Strategic Maintenance Consultancy

The team at Shire have an extensive range of maintenance experience - we can help define your requirements and scope your system, project management resources and dedicated team members to guide you through the process

Training

Training can take place at your premises or at any of our centres around the country. Attendees only require basic Windows PC skills and the training team cover the subjects at a suitable pace. Classes are no larger than 10 at a time.

Support

Your Annual Support contract provides you with unlimited access to the Shire Helpline as well as free updates to the software as they become available. The Shire Support team are an experienced group of friendly and knowledgeable people.

Technical Requirements

The performance of the system will be affected by the specification of the computer on which it is operated. The minimum recommended hardware requirements are:

Windows 98 Second Edition/ Millennium Edition

- 400 MHz Pentium Processor, or equivalent
- 128 MB RAM
- Minimum 800x600 screen resolution
- CD-ROM Drive
- Floppy Disc drive or email to install licences
- Windows 98 requires Internet Explorer version 5.0 or above

Windows 2000/ Windows XP (Home & Professional)

- 500 MHz Pentium processor or equivalent
- 256 MB RAM
- Minimum 800x600 screen resolution
- CD-ROM drive
- Floppy Disc drive or email to install licences

FrontLine may be installed as a stand alone system or in a multi user network configuration for which extra user licences are supplied on a concurrent user basis.
