

Your Invitation to the Northampton 2012 Roadshow

The key objective of the popular Shire Roadshows is to provide an informal forum of useful discussion and discovery. Using a simple, no-nonsense approach we aim to deliver valuable insights into the planning of systems set-up and administration.

We will also feature the core functionality common to both our FrontLine and Pirana maintenance management systems as well as highlighting the principles in deciding which solution to choose.

Roadshows are ideal for existing users to ask questions and learn about valuable undiscovered functionality, tips and good practice.

Those considering adopting a CMMS will learn a great deal about the capabilities and features of FrontLine and Pirana.

In fact, there's something for everyone!

Morning Session – 10.00am – 12.45pm

- * Method and Set-Up—A demonstration using FrontLine. The principles outlined will also apply to Pirana set-up.
- * Preview of the next FrontLine release which includes new Information Tools (Dashboard) and a brand new Web Work Requester.

Afternoon Session – 1:30 – 3:45

- * Pirana - The key benefits of making the transition from FrontLine to Pirana.
- * Latest functionality available in Pirana version 3.
- * Details of upcoming releases.

To reserve your free place please
